# **User Guide: What's news for VeVA Online users and waste disposal facilities**

## DETEC eGovernment Portal

---

The Waste and Resources services currently available on the DETEC eGovernment Portal can be used to manage the organisation (master data), the site (waste disposal facility and disposal company in accordance with the OMW, waste generating company, exporter) and the annual waste reporting for waste not subject to regulatory controls [nk].

Companies that were previously registered on VeVA Online have been migrated to the DETEC eGovernment Portal as a site and organisation.

### Edit site

Edit your site's information and waste codes. All changes need to be verified by the relevant cantonal office.

[Go to service](#)  
[Detailed information](#)

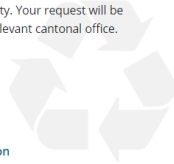

If you wish to make changes to an existing site or add or delete waste codes, you can do this *yourself*. To do this, start the 'Edit site' service.

### Apply for site and company number

Create a new site with a company number. You can register the site as a waste generating company or a waste disposal facility. Your request will be processed by the relevant cantonal office.

[Go to service](#)  
[Detailed information](#)

If you would like to enter a new waste disposal facility or a waste generating company, start the 'Apply for site and company number' service. Here you enter the master data.

For waste generating companies, you also have to select the *industry*. If it is a waste disposal facility, you must specify the *facility type* and other operational data and the *waste codes* to be accepted.

The VeVA Online processes for hazardous waste [S], other waste subject to regulatory controls with mandatory accompanying documentation [akb] and other waste subject to regulatory controls without mandatory accompanying documentation [ak] *continue* to run on VeVA Online.

The usual evaluation tools can also still be used on VeVA Online until further notice,

independently of the DETEC eGovernment Portal.

### Annual waste reporting nk

Submit your site's annual report for waste not subject to regulatory controls [nk]. This information must be submitted every year and is checked by the cantonal offices.

[Go to service](#)  
[Detailed information](#)

With the reporting obligation, the waste reporting is applied for waste that is not subject to regulatory controls as well as for waste that is subject to regulatory controls. The waste not subject to regulatory controls [nk] is recorded using the 'Annual waste reporting nk' service.

Additional features are available to the cantonal officials to check these reports, decide on them and approve them for the FOEN.

### Help

You can find instructions on how to use our 'Waste and Resources' services, information about the changes to the VeVA-Online platform and more here.

[Detailed information](#)

Further information and tips on using the Waste and Resources services can be found in the portal, under the relevant information service or in the FAQs.
